Champion Nurseries

Field of Catalpa Bungei

Perry, Ohio

FOREWORD

THE Champion Nurseries was founded thirty-seven years ago. The Founder, H. J. Champion started this nursery on a little farm containing twenty-four acres, about half of which was devoted to the growing of nursery stock, consisting of small fruit plants, peach and other fruit trees: a few years later hardy shrubs, shade trees and other ornamentals were added to the line.

Although the growth of the business has not been rapid it has been constant, due in no small degree to the founder's integrity, which was beyond reproach.

Since the founder's death, the business has been carried on by the younger generation, who have adhered so closely to the founder's policies and business principles that the business has slowly grown to such an extent that it requires over 250 acres of land to supply the trade at the present time.

We wish to express our appreciation at this time to our many friends and customers for their splendid cooperation in helping to build up this business to a point where it is a real service to the nursery buying public.

Our storage and packing houses were increased last Summer which gives us ample space for storing, grading and packing the stock and is so arranged that we are in a better position to serve our customers promptly.

It has always been our policy to welcome our friends and customers to inspect our nursery and packing houses and are always glad to show them our stock whether interested in purchasing or not. We therefore, extend to you a cordial invitation to visit us.

Apple Trees

The following varieties of apples have been selected from some 200 varieties that are offered by the American nurseries. No one nursery could afford to grow all the varieties that are known in this country and we have selected the varieties that are best adapted to the north-eastern section of America. Whether you wish to plant a commercial orchard or for home use you will find the assortment listed here ample to fill your needs.

The varieties marked * can be furnished in dwarf as well as standards.

Price of Apple—2-Year

	Each	10	100
3 to 4 ft.	\$.40	\$3.50	\$25.00
4 to 5 ft.	.65	6.00	40.00
5 to 7 ft.	.75	7.00	50.00

Summer Varieties

Early Harvest—The tree is above the average in vigor, hardiness, productiveness and healthfulness. The fruit is medium in size, yellow with white flesh. As it is the earliest summer apple and excellent for dessert or cooking this apple should be in every home collection.

Golden Sweet—Is a standard early variety for home use. Few apples surpass this in richness and sweetness of flavor, while of only medium size, they are very attractive in appearance, uniform in size and shape. The handsome, clear yellow fruit ripens in August.

***Red Astrachan**—The trees come into bearing young and bear regularly and abundantly. The fruit is large and is the standard red summer apple. They are fit for cooking long before maturity and, when fully ripe are fair for dessert, having a long season of usefulness. Ripens last of July.

***Sweet Bough**—The fruit is large and handsome. The tender flesh and honied sweetness of the fruit as eaten from the hand remain in what ever way the apple may be prepared for the table. Too tender for a distant market, but are ideal for home use or local market. The pale yellow fruits ripen in August.

Yellow Transparent—Tree is not a large grower, but extremely hardy and comes

into bearing very young. The apples are above medium size and have a clear, clean yellow color; fine for home market and a very profitable filler. Early August.

Autumn Varieties

***Duchess of Oldenburg**—Tree is a small grower, very hardy, comes into bearing young, makes an excellent filler. The apples are large, striped red and yellow, flesh white, juicy and excellent flavor, the best general purpose apple of its season, ripens August and September.

Maiden Blush—This old favorite, known by fruit growers in America everywhere for over a century, holds its popularity chiefly by virtue of its distinctive and very handsome crimson-cheeked, lemon-yellow apples. Very good for cooking, evaporating and for the market. Keeps well for market from September till November.

Winter Varieties

***Baldwin**—The trees are vigorous, long-lived and healthy and very productive, individual trees not infrequently bearing twenty barrels of apples and the crop is usually uniform. The fruits are large, when well grown are attractive in color, keep long and are good shippers. November to March.

***Banana**—Trees are hardy, fairly vigorous, bearing young, almost annually and are usually fruitful. The fruits are large, shapely, with a most handsomely colored skin—clear pale waxen yellow, with a delicate blush which some times deepens into a bright red. The flavor is that rich mixture of sweet and sour, which characterizes most of our best fruits. October to March.

Cortland—The fruits of Cortland ripen a little later than McIntosh, keep longer, larger and brighter in color. The shape, taste and flesh characters of the two are almost identical. The trees are much the same. The Cortland is an improved McIntosh and as such is sought for in sections where McIntosh is known. October to January.

***Delicious (Red Delicious)**—Tree large, spreading, vigorous, hardy and productive. Fruit large, uniform, nearly dark red all over, flesh fine grained, crisp and melting, very high quality, a splendid keeper and good shipper, November to April.

***Grimes Golden**—Tree is hardy and productive, and one of the best fillers as it comes into bearing young. The fruit is medium to large, the skin is golden yellow, sprinkled with gray dots; flesh crisp and tender, pleasantly acidulous flavor, and most pleasant aroma. December to April.

Jonathan—The trees are usually hardy, vigorous and productive and very accommodating as to soils and climate. The fruit by general consent is placed among the very best in both appearance and quality. Though only medium in size the fruits are large enough for a dessert apple. The flesh is firm, crisp, tender, juicy and of good flavor. The brilliant red skin, indistinctly striped carmine and underlined with pale yellow makes it one of the most attractive apples. Splendid family sort and highly profitable for market. November to January.

Rome Beauty—The tree is of medium size, but vigorous, comes into bearing early, loaded with fruit annually, hang well on the tree in high winds. The apples are large, smooth, handsome, uniform in size and shape, thick skined and therefore ship and keep well, always sell at good prices. November to May.

Road Island Greening—Trees are of large size, have wide spreading, drooping branches, rejoice in health and vigor, load themselves with fruit and are long lived. This is the favorite green apple of the con-

tinents. It ranks among the first half dozen commercial varieties of the country, and is to be found in as many home orchards as any other apple. Fine for cooking or dessert, ripens in December and keeps till April.

***Northern Spy**—A hardy, large, red winter apple. Flesh juicy, rich, crisp, tender, aromatic, of good flavor. Tree very healthy, strong, rugged grower, blossoms very late escaping frosts. It retains its crispness and high flavor well to the end of its season. December to March.

King (Tompkins Co.)—Tree vigorous grower, hardy, and a good bearer. The large fruits are a beautiful red on a yellow background, handsomely molded, while the flesh is rather coarse, it is crisp, tender, juicy, aromatic and richly flavored, has few superiors on the score either of beauty or quality of fruit; October to April.

***Staymen's Winesap**—Tree a quick and large grower, bears young, often producing a barrel to a tree when five years old. Bears every year, crops uniformly heavy, of medium to large attractive fruits; green and yellow overlaid by dark red stripes. A very fine apple for commercial or home use. December to April.

***Wealthy**—Is one of the best early, red winter apples. Owing to its early bearing qualities it is used largely for a filler. Fruit large, roundish; skin smooth, covered with dark red. Flesh white, tender, juicy, subacid; quality very good. October to Jan.

Wagener—Tree is of dwarfy nature, hardy and comes into bearing early, an annual bearer of heavy crops of beautiful red apples of the highest quality. Medium to large apples that keep well from December to May.

McIntosh—An exceedingly valuable, hardy, attractive apple; good size, nearly covered with red. Flesh white, fine, very tender, juicy and refreshing. Tree hardy, vigorous, a good annual bearer—comes into fruiting early, yielding large crops. October to January.

Pear Trees

Our pears are budded on French stock, as our experience has taught us that the French seedling will produce a better tree than any other we can procure.

Varieties marked * can be furnished in dwarf as well as standard.

Prices of 2-Year Standard

	Each	10	100
3 to 4 ft.	\$.60	\$5.00	\$35.00
4 to 5 ft.	.70	6.00	50.00
5 to 7 ft.	.80	7.00	60.00

Price of 2-Year Dwarf

3 to 4 ft.	\$.65	\$5.00	\$35.00
4 to 5 ft.	.75	6.00	45.00

***Anjou**—Trees are vigorous, hardy, grow rapidly and come into bearing early. The fruits are large, greenish yellow and very uniform, flesh firm, but very juicy, sweet and spicy; as an early winter pear it has no superior and few that equal it. October to January.

***Bartlett**—Leads them all for number of trees planted, as its adaptability to various soils and climate gives it a precedence. The fruits are large, handsome, of good quality and keep and ship remarkably well, making it a very profitable market sort. September.

***Clapp's Favorite**—Is the standard late summer pear to precede Bartlett, which it much resembles in size, shape, color and flavor. The season is a week to ten days before Bartlett. Tree large, upright, spreading, round-topped, hardy and productive. Does best on heavy clay soil.

***Duchess**—Tree is vigorous, hardy and healthy, bears abundantly under favorable conditions and succeeds either as standard or dwarfs. Is the favorite dwarf pear for the garden or home orchard. The fruits are exceptionally large and may always be known by their size. The flesh is buttery and melting with a rich and delicious flavor. One of the leading market sorts. October and November.

Flemish Beauty—This fine old pear is

still one of the hardiest and most generally successful over a wide range of country, producing good crops annually of large, handsome fruits that are exceptionally good in quality. September and October.

Kieffer—Tree most vigorous grower, an early bearer, one of the most resistant to blight, very prolific and consistent bearer. Fruits are large, golden yellow, of fair quality, should be left on the tree until the leaves begin to fall, then picked and allowed to ripen in a cool dark cellar. October to December.

Lawrence—The tree is hardy, fairly vigorous, and fruitful, an early and annual bearer, and has the reputation of being the longest lived of all pear trees. The fruits are medium in size, golden yellow, very rich, the finest early winter pear for the home orchard. November to December.

Sheldon—The fruits of Sheldon satisfy both the eye and the palate; no rival of its season surpasses them in either appearance or quality. The fruits are medium in size, more or less russeted, with a handsome ruddy cheek, flesh is melting and juicy, keep and ship well, and should be in every orchard for home use. October.

***Seckel**—A small pear of excellent flavor; fine for pickling or dessert, very productive and a profitable commercial pear. Seckel stands almost alone in vigor of tree, and immunity to blight. September and October.

***Worden Seckel**—The fruits are little larger than Seckel and more handsome. Smooth, glossy, uniform, with a beautiful blush cheek on a handsome yellow back ground. When the crop is thinned so that the fruits attain large size, no pear is more handsome, or will bring a higher price on the fruit stand. The crop comes in with Seckel but keeps longer. The tree is very hardy and bears young.

***Wilder**—Very early pear of excellent quality, medium to large, bell shaped; pale yellow with shadings of russet-red. Tree is large, vigorous, productive and healthy as any. Every home orchard should have some. Early August.

Cherry Trees

Budded on French, imported, branched root seedlings. Grown on loose gravel soil, thereby producing a good fibrous root system.

Price of Sweet Cherry—2 Years Old

	Each	10	100
4 to 5 ft.	\$.90	\$7.50	\$65.00
5 to 7 ft.	1.00	9.00	75.00

Price of Sour Cherry—2 Year

2 to 3½ ft.	\$.80	\$6.50	\$50.00
3½ to 5 ft.	.90	7.50	60.00
2 to 3 ft.—1 yr.			35.00

Varieties of Sweet Cherry

Bing—Is one of the best of the several very good cherries from the Pacific Northwest. The fruits are almost unequalled in size, attractiveness and quality. The fruits hang well on the tree and ripen at one time, does well everywhere. Some of these trees, that bear dark brown, almost black fruit should be in every orchard. July.

Black Tartarian—Is a favorite door-yard and roadside tree. It is adaptable to large variety of soils, lives long, and bears regularly. The fruit is of medium size, purplish-black, tender and sweet. June and July.

Governor Wood—One of the best sweet cherries, very large, light yellow, marbled with red, juicy, rich and delicious; tree healthy and great bearer. Fine for the home orchard. June.

Lambert—The tree is healthy, vigorous and usually fruitful and regular in bearing, large heart-shaped, black fruits that are meaty, juicy and have a very rich flavor. Late July.

Napoleon—Is the leading, firm-fleshed sweet cherry. It takes its place by virtue of the large size, handsome appearance and high quality of the fruit, and the phenomenal productiveness of the trees. The rich, sweet flavor with abundant juice and firm crackling flesh makes this a most delicious and refreshing cherry for dessert, its great size and attractive color gives it preference over all other sweet cherries for canning. Besides being very productive, the trees come into bearing young, and are hardy and healthy. July.

Schmidt—The fruits are large, being un-

surpassed in size by any other black cherry, they are round and plump in form and glossy black in color; the flesh is dark ruby-red under the skin, which makes the cherry as pleasing inwardly as outwardly; are free from brown-rot, in this respect excelling any other market sort. The trees are vigorous, healthy and productive. July.

Windsor—Tree large, vigorous, upright-spreading, open-topped, very productive. Windsor is the standard late Bigarreau and one of the most profitable grown in America. In color the cherries meet the market demand as buyers prefer a dark-colored sweet cherry. The fruits are firm and stand harvesting and shipping well. The quality is good, equaled but not surpassed by others of its class. The trees have the reputation of being the hardiest of Bigarreaus, of thriving in many soils and of being fruitful. July.

Yellow Spanish—The trees are the largest of all the varieties of sweet cherries, bear abundantly and regularly and come into bearing young. Fruits pale yellow, with red cheek, firm, juicy and excellent; one of the best light colored cherries. Last of June.

Sour Cherries

Dyehouse—The earliest cherry of fine quality, often bears at two years old, ripening its crop a week earlier than Early Richmond, fruit hangs well on the tree, fine for tarts and pies and especially for canning it has no superiors. Early June.

Early Richmond—Has long been the leading sour cherry of its season. Tree of medium size, hardy and bears heavy crops when young. The tree thrives in many soils and climates and everywhere, vigorous, healthy and fruitful. June.

English Morello—The standard late cherry following Montmorency. Tree is not a large grower, can be closer in the orchard than other trees. The fruit is dark wine color, firm and ships well. Aug.

Montmorency—Is the most popular sour cherry grown in America. It is surpassed by no other sour cherry in vigor, health, and productiveness of tree, year in and year out Montmorency trees are fruitful. No other sour cherry is adapted to a greater diversity of soils, with its capacity to stand heat and cold, makes the

SOUR CHERRY—Continued

variety suitable to wide variations in environment. The fruits have the advantage of being presentable in appearance and fit for culinary purposes several days before it is fully ripe, which adds to its value for market. The fruits stand handling, in harvesting, shipping and on the market. July.

May Duke—Large, dark red; tender; sub-acid and very hardy. Fruits hang well on the tree, lasting from a month to six weeks. Fine for the home orchard or for local market. Middle of June.

QUINCES

Quinces are a valuable tree for ornamental purposes as well as for the fruit, as there is no bush or tree that surpasses them in beauty when in bloom.

Price of Quince Trees—2 Year

	Each	10	100
3 to 4 ft.	\$.80	\$7.50	\$50.00
4 to 5 ft.	.90	8.50	60.00

Champion—Very large, late sort, very productive, with flesh almost as tender as an apple.

Orange—Fine old sort, large, round, bright yellow, with excellent flavor. Oct.

Plum Trees

Budded on the best branched root French Myroblan seedlings.

Price of 2-Year Trees

	Each	10	100
4 to 5 ft.	\$.70	\$6.00	\$45.00
5 to 7 ft.	.80	7.00	55.00

Abundance—Medium size, amber, turning to red; flesh yellow, juicy and tender. August.

Burbank—Large size; red, tree hardy and productive. Late August.

Bradshaw—Very large, dark violet red, good market sort. August.

German Prune—A valuable plum for preserving and drying; dark blue, juicy and rich. September.

Genii—Large, bluish purple with deep bloom, flesh yellowish green, rather coarse, sweet, pleasant, one of the best market varieties. September.

Italian Prune (Fellenburg)—The trees are large, hardy, productive, well formed and bear regularly. The fruit is finely flavored, whether eaten out of the hand, prepared for the table, or cured as a prune. While a little too tart to be ranked as a first-rate dessert plum, it is one of the best of the prunes. As a cured prune, the flesh is firm and meaty, yet elastic, of good color and a perfect freestone. September.

Lombard—Tree is of medium size, round topped, very hardy and prolific bearer. Fruits medium to large, dark red, very attractive and tempting to the eye, and readily saleable. A very profitable market sort. Last of August.

Monarch—Large; deep purplish blue; tree bears young and yields abundantly, a perfect free-stone. October.

Reine Claude (Bevey's Green Gage)—large round, greenish yellow; excellent for canning; one of the best varieties; very productive. September.

Shippers' Prdie—Large; deep purple; fine, good shipper. September.

Shropshire Damson—Tree is enormously productive, bearing loads of fruit year after year, trees are large, hardy and healthy. Fruits are oval; of medium size, produced in thick clusters, dark purple in color; fine for preserving. October.

Yellow Egg—Golden yellow with thick bloom; flesh yellow; juicy, a very large and beautiful plum; fine for local market. Tree large and very productive. Sept,

Shippers'
Late
Red
Peach

Bigger
and
Better
than
Elberta

Shippers' Late Red Peach

Shippers' Late Red is a peach that has every indication of becoming a more popular commercial variety than Elberta, due to the many superior qualifications.

The tree is hardy, comes into bearing early and bears annually. The fruit is as large or larger than Elberta. Yellow; coloring nearly red all over; of good quality; free stone; of good flavor, sweet and juicy.

Perhaps the most outstanding feature is it hangs well on the tree. During long, rainy spells or a glut in the market, Shippers' Late Red will remain on the tree for a week or ten days without injury to the fruit, this feature alone makes it a very favorable market sort.

PEACH TREES

The soil and climate conditions along the South shores of Lake Erie, where our Nurseries are located, is ideal for the culture of peach trees. For many years we have made the growing of peach trees a leading specialty and have many orchards the entire plantings of which came from our Nurseries.

The trees are budded on seedlings grown from seed gathered from Southern natural fruit that are entirely free from peach yellows and other injurious diseases.

The buds are cut from bearing trees every three or four years, which enables us to keep our varieties strictly true to name.

The time of ripening in the following descriptions is given for the immediate territory on the Southern Shores of Lake Erie.

Peach Trees—Continued

Admiral Dewey—The peaches are yellow in flesh, good in quality and classed as a free stone of only medium size, but are the very earliest peach we grow and is valuable for this fact, that it ripens in July.

Bell of Georgia—Very large; white with red cheek; firm; of excellent flavor; tree very thrifty and productive. August.

Banner—Large; yellow with red cheeks; flesh firm and rich; an excellent shipper. Tree bears young and is very hardy. We believe this to be one of the most profitable market varieties. October.

Beer Smock—Large yellow; a very profitable market sort as it ripens in early Oct.

Carman—Quite large; creamy white and deep blush; tree hardy in bud. August.

Champion—Large; white with red cheek; sweet, rich and juicy; hardy and productive. August.

Crawford's Early—A fine old variety; very large, yellow, rich and juicy. Last of August.

Crawford's Late—Large yellow; sweet; rich. September.

Crosby—Medium to large; yellow flesh; small pit; good quality and productive. Ripens about September 15th.

Early Elberta—Large; yellow with red cheek; fine quality; ripens ten days earlier than Elberta.

Elberta—Very large; yellow with red cheek; good shipper; succeeds everywhere. September.

Fitzgerald—As large as Crawford; very best quality; a heavy bearer; tree fruits very young ripens just after Early Crawford.

Gold Drop—Medium size; yellow, tree is hardy and bears early.

Hale—Large yellow of good quality and a good shipper.

Heath's Cling—Large, creamy white with faint blush; good quality valuable for preserving and canning. October.

Kalamazoo—Large yellow with crimson cheek; good quality. September.

Lemon Free—Large; resembles a lemon in shape and color; excellent for canning; very productive. Last of September.

New Prolific—A fine yellow peach; hardy; productive. Ripens just before Elberta.

Rochester—A new yellow peach, large

and good quality. Tree bears young and a good cropper. August 10th.

Salberta—A large yellow, of good quality, ripening after Elberta. It is said to be a cross between Elberta and Salway. A fine market peach.

Salway—Very large; yellow; firm; rich and juicy. Very late October.

Stearns—A new peach originated in Michigan. Large yellow free-stone with large, red cheek; follows Elberta. As a shipper it can not be surpassed. Tree a very strong, upright grower. September.

Wilma—Fruit is as large as Elberta, colors very much better and ripens about ten days later. Its more attractive color outsells Elberta. Also known to some as Late Elberta.

Wooster—Is a large, yellow free-stone with red cheek, handsome; of highest quality. The tree is very hardy in wood and bud. Bears large crops annually when others fail.

Wooster was introduced by us several years ago, buds were procured from a seedling growing on a farm not far from Pittsburgh, Pa. Do not know of any other nursery that is propagating this peach.

Our sales from this variety are increasing annually. Ripens about September 20.

Yellow St. John—A fine early, yellow peach with red cheek; good bearer. Aug.

APRICOTS

Moorpark—One of the largest; orange with red cheek; very productive. August.

Superb—Very hardy and productive; large; yellow, rich and sweet.

Price of Apricots

	Each	10
3 to 4 feet	\$.65	\$5.00
4 to 5 feet	.80	7.00

BLACKBERRIES

Eldorado—The leading, standard market variety; berries are large, black and very sweet having no hard core; very hardy and productive. Price, 10 for 75c; 100 for \$5.50.

Blower—Claimed to be the hardiest, most productive and finest quality and commands the highest market price; large size, jet black; excellent shipper, a fine new sort. Price, 10 for 75c; 100—\$5.50.

GOOSEBERRIES

Downing—Fruit large, handsome, pale green and of excellent quality. Bush is a good grower.

Houghton—An old reliable sort, very vigorous and productive. Fruit medium size, pale red and of good quality.

Jesselyn or Red Jacket—Large, smooth, of good flavor; the bush is hardy with clean foliage and bears good crops of red berries.

Price on Gooseberries

	Each	10	100
Downing, 2-yr.	\$.25	\$2.00	\$12.00
Houghton, 2-yr.	.20	1.50	10.00
Red Jacket, 2-yr.	.30	2.50	20.00

CURRENTS

Fay's Prolific—One of the leading red market currants, as large as the Cherry, but a better flavor.

Wilder—Very productive, bush strong, upright grower; fruit red and very handsome, a long keeper and a good shipper.

White Grape—Excellent for table use, mildly acid and one of the best for dessert use.

Perfection—Beautiful, bright red, large size, rich, mild and very productive; sub-acid flavor, pulp having few seeds.

Price on Currants except Perfection

	Each	10	100
Two-year	\$.25	\$2.00	\$15.00
Perfection	.30	2.50	20.00

RASPBERRIES

Cumberland—Black, large and productive, firm, good shipper.

Columbian—Purple, large and very productive.

Cuthbert—Red, sweet, rich, highly flavored. Late.

Plum Farmer—One of the best black caps grown, produces large crops black berries of high quality. Profitable market sort.

Gregg—Large, black, firm, good shipper. Late.

June—Bright red berry, larger than Cuthbert, far superior in quality, has a long season and the earliest berry.

Latham—The new hardy, red raspberry, promises to be the leading raspberry of its class. The berries are large and round, color is richly brilliant red, very showy in

the market. Latham is perfectly hardy withstanding Manitoba winters without protection.

St. Regis—Everbearing; berries bright crimson; rich and sweet; ripens with the earliest and continues in young canes until October.

Price of Raspberries

	10	100	1000
Cumberland and Plum Farmer	\$.75	\$4.00	\$25.00
Gregg	.75	4.50	30.00
Cuthbert	.50	3.00	25.00
St. Regis	.50	3.50	30.00
June	.75	5.00	40.00
Latham	1.25	8.00	70.00
Columbian	.75	4.00	35.00

STRAWBERRIES

Everyone having any room for fruit should have a strawberry bed. We have made the growing of strawberries one of our specialties. We grow them on rich, loose, gravelly soil that produces strong, vigorous plants, which are second to none.

Those varieties marked (p) are perfect bloomers and those marked (i) are imperfect and require that every fourth or fifth row be planted with some perfect blooming variety.

Early Ozark (p)—Plant healthy with dark green foliage; fruit firm and of great size; the largest early strawberry.

Excelsior (p)—Dark red; vigorous grower; very productive. Early.

Gibson—Berries large, excellent flavor; color deep red. A profitable mid-season berry.

Premier—Large, dark red, excellent flavor. Fine for market or home use. Early.

Climax (p)—A fine grower bearing large crops of rich, round, red berries of fine quality. Excellent for market or home use. We believe this to be one of the most profitable berries grown. Medium early.

Dunlap (p)—Medium early and continues in bearing a long time; fruit medium to large; deep red; flesh red; very productive; a grand berry.

Glen Mary (p)—Medium early; large; firm and good shipper.

Parson's Beauty (p)—Mid-season. Vigorous growers and very productive; fruit is large, bright red and firm. A very popular sort.

Strawberries—Continued

Sample (i)—Late. Plant is large and healthy, making plenty of runners; fruit large, roundish and dark red; succeeds everywhere.

Wm. Belt (p)—Mid-season. Large size; bright red color; a good plant maker.

Jesse (p)—Mid-season. Berries large and very sweet; succeeds well in some localities.

Uncle Jim (p)—Mid-season. Large size and of excellent quality.

Stevens' Late Champion (p)—Late. This variety makes strong, vigorous plants, which yield heavy crops of fruit, and throw out lots of runners; fruit large, bright red; flesh is also red, but lighter and of good flavor.

Everbearing Berries

Superb—One of the best; Fall bearers; also yielding good crops in June.

Progressive—Plants vigorous and healthy; blooms are well protected by the foliage; a good yielder.

Prices of Strawberries

	100	1000
Leading Varieties	\$1.00	\$7.00
Everbearing	2.50	12.00

Grape Vines

Agawam—Berries quite large with thick skin; sweet and juicy; grows and bears well. Red.

Brighton—Large and of good flavor. A fine early grape. Red.

Campbell's Early—Large size clusters, berries round with small seeds; ripens early and holds its fruits well. Black.

Catawba—Large, when fully ripe they are a dark copper color. Requires a long season.

Concord—A fine market grape; large and handsome. The most extensively planted of any of the grapes. Black.

Delaware—Light red, sweet and delicious. A favorite dessert grape.

Diamond—The leading early white grape, ripening before Moore's. White, with rich yellow tinge, juicy; few seeds, almost free from pulp, excellent quality; above medium size; adheres firmly to stem.

Moore's Early—Clusters of medium sized berries, large and black, very hardy and ripens early.

Niagara—Clusters are large and handsome; when fully ripe they are a fine pale yellow. The vine is vigorous and productive; ripens with Concord. The best white grape for home or market.

Pocklington—Large, yellow; sweet and tender; ripens after Concord.

Salem—Bunches of berries large; red; of good quality; vines vigorous.

Wyoming Red—One of the most beautiful of red grapes; early; flesh tender, juicy and sweet; vine hardy and productive.

Worden—Large and of fine flavor; ripens few days before Concord. Black.

Nut Trees

Chestnut—American Sweet—Tree, large and spreading, bearing large crops of sweet nuts.

American Filbert (Hazelnut)—Small tree or large bush, bearing medium sized nuts, with one kernal of meat, tree will grow in most any soil, but prefers moist location.

Walnuts—English, produces large crops of thin-shelled nuts that are always in good demand. Our trees are the hardy northern grown stock.

Walnut—Japan, Sieboldi—Perfectly hardy, rapid grower, bearing young, nuts very much like the American butternut only the nuts are borne in clusters of three to six nuts.

Walnut—American Black—A native tree that bears heavy crops of large round nuts that are very rich and sweet.

Price of Nut Trees

	Each	10

RHUBARB

Linneaus—Large, tender and juicy, very early.

Queen—Large, pink stalks, good for canning..

Price of Rhubarb—2-yr. roots, 15c each; ten for \$1.25; \$7.00 per 100.

Deciduous Trees

For Shade and Lawn

Maple, Silver—A large and spreading tree of rapid growth. Will make shade quick. 8 ft., \$1.25; 10 ft. \$1.75; 12 ft. \$2.25.

Maple, Norway—A handsome, large tree with dense foliage, makes a very fine lawn tree. 6 ft. \$2.50; 8 ft. \$3.00; 10 ft. \$3.50.

Maple, Sugar or Rock—Long lived and very hardy, fine for roadside planting or lawn specimen. 6 ft. \$1.50; 8 ft. \$2.00.

Birch, Cut Leaf Weeping—This is one of the finest lawn trees grown. The long weeping branches loaded with shiny green cut leaves, and its silvery white bark is very beautiful on the lawn or roadside. We have made this tree our leading specialty for many years. Should be planted as early in spring as possible. 5 ft. \$3.00; 6 ft. \$3.50; 8 ft. \$4.00.

Catalpa, Speciosa—Fine, hardy tree with heart shaped leaves, very rapid grower bearing long pods in the fall. 6 ft. 90c; 8 ft. \$1.00.

Catalpa Bungei or Umbrella Tree—Hardy, strong growing with umbrella shaped top. The top is grafted on to five to six foot stems. Heads, 2-yr.-old, \$1.75 each. Dwarfs grafted on to stems about 2 ft., 2-year heads, \$1.00 each.

Elm, American—A grand old tree, does well on any soil. 6 ft. \$1.25; 8 ft. \$2.00.

Linden, American—A fine tree with large shiny leaves. 6 ft. \$2.50; 8 ft. \$3.00.

Sycamore, European—One of the oldest cultivated trees, and one of the best for planting in smoky cities as they stand smoke and gases better than any other shade tree. 10 ft. \$2.00; 12 ft. \$2.50.

Wisconsin Willow—A beautiful weeping tree for the lawn or along the brook. 6 ft. \$1.00; 8 ft. \$1.50.

Tees Weeping Mulberry—A low growing weeping tree with grafted head. 2-year heads \$3.00 each.

DECIDUOUS FLOWERING TREES

Cornus Florida—White flowering dog-wood. Tree is of branching habits, grows about 20 ft. high with large, white flowers in May and June. 4 ft. \$3.00; 6 ft. \$4.00.

Cornus Florida Rubra—The Red flowering Dog-wood. Growth very similar to the white flowering variety except the flowers are red in color. 3 ft. \$4.00.

Crab, Bechtle Flowering—A low growing tree, with large clusters of pink, rose-shaped flowers. One of the handsomest flowering trees grown. 2 to 3 ft. \$1.00; 3 to 4 ft. \$1.25.

Prunus Pissardi (Purple Leaf Plum)—Small tree, for lawn tree in single planting or groups, shiny purple leaf. 3 to 4 ft. 85c; 4 to 5 ft. \$1.00.

Prunus Triloba (Double Flowering Plum)—Small tree grown for their beautiful double, delicate pink flowers. 2 to 3 ft. 85c each; 3 to 4 ft. \$1.00 each.

Tulip Tree—Large native tree of rapid growth, bearing tulip shaped flowers of green and orange hue. 6 ft. \$1.50; 8 ft. \$2.00.

Thorn (Paul's Scarlet Thorn)—A small tree with showy, large, crimson flowers in May. 3 to 4 ft. \$2.00; 4 to 5 ft. \$3.00.

Deciduous Shrubs

Althea or Rose of Sharon—Blossoms in August and September. Suitable for hedge as well as single lawn shrub. We have the following colors: double white, pink, purple and red. 2 to 3 ft. 50c each.

Almonds—Pink and white flowering, large double flowers in early spring, set thick along the branches. 3 ft. 50c each.

Butterfly Bush or Summer Lilac—Very quick growing shrub that blooms in July. Long spikes of purple flowers. 2-yr. plants 40c each, ten for \$3.50.

Calycanthus—A medium sized shrub, with odd shaped, chocolate colored flowers; leaves and wood have a spicy odor. 18 to 24 in. 60c each.

Cornus Elegantissima—Large growing shrub with bright red branches, leaves variegated, green and white, very showy. 2 to 3 ft. 80c; ten for \$7.00.

Cornus Spathi Aurea—Similar to the *Elegantissima* except leaves are variegated green and yellow, 2 to 3 ft. 80c; ten for \$7.

Cornus Paniculata—Good sized tree-like shrub, white flowers in June, followed by white berries on noticeable red branches. 3 to 4 ft. 50c; ten for \$4.50.

Deutzia, Pride of Rochester—Beautiful shrub, grows eight to ten feet tall, with large double white flowers in May. 3 to 4 ft. 50c; ten for \$4.00.

Deutzia Rosea—Very similar to P. of R. except outer flower petals are flushed with pink. 3 to 4 ft. 50c; ten \$4.00.

Deutzia Lemoinei—Semi-dwarf in growth, reaching height about three feet, flowers double white. 18 to 24 in. 50c each; ten for \$5.00.

Deutzia Gracilis—Same flower as the above, but is strictly a dense dwarf, rarely over 2 feet in height; just the shrub for foundation, or border planting. 15 to 18 in. 60c; ten for \$5.00.

Clethra Alnifolia (Sweet Pepper Bush)—A handsome little shrub delightfully fragrant in August and September. Long showy spikes of creamy white flowers. Medium in size, rarely ever reaching above five feet. 2 to 3 ft. 60c; ten for \$5.50.

Honeysuckles are valuable for screens, or to be used in groups with other shrubs.

H. Bella Albida—Upright in growth, white flowers, followed by red berries. 3 to 4 ft. 60c; ten for \$5.00.

H. Morrowi—A spreading variety with white flowers in spring, followed by red berries. 3 to 4 ft. 60c each; ten for \$5.00.

H. Tartarian Red—Upright in growth, deep rose pink flowers in early summer, with red and orange berries in fall. 3 to 4 ft. 60c; ten for \$5.00.

H. Fragrantissima—Foliage a very deep green that often hangs, practically all winter. Does well in shade. Creamy white blossoms, fragrant. Makes a nice hedge where a large screen is desired. 3 to 4 ft. 60c each; ten for \$5.00.

Forsythia (Golden Bell)—A fine old shrub that is loaded with golden yellow in early spring before the leaves appear. The earliest flowering shrub. 2 to 3 ft. 50c each; ten for \$4.50.

Golden Elder—Leaves golden with white flowers. If not pruned will attain a height of ten to twelve feet. 2 to 3 ft. 50c each; ten for \$4.00.

Deciduous Shrubs—Continued

Hydrangea Paniculata Grandiflora—An old and familiar shrub. Blooms in August and September; large, massive white flowers, changing to pink and bronze. 18 to 24 in. 50c each; \$4.50 for ten.

Hydrangea Arborescens or Hills of Snow—A good plant for shady places. Flowers white, similar in shape to the common snow ball, changing to green as the flower gets older. 18 to 24 in. 50c each; ten for \$4.50.

Japan Quince (Cydonia Japonica)—A fine old shrub, covered with scarlet flowers in early spring, large yellow fruits in Autumn. 18 to 24 in. 60c each; ten for \$5.50.

Kerria Japonica, Fl. Pl.—A handsome green leaved and green stem shrub, with rich yellow double flowers in June. 18 to 24 in. 75c each; ten for \$6.00.

Kerria Japonica—Single flowered shrub same as the above only hardier. 18 in. 75c; ten for \$6.00.

Kerria White (Rhodotypos Kerriodes)—An attractive shrub growing to 5 feet with single white flowers in May. Does well in shade. 18 to 24 in. 75c each.

LILACS (Syringa)

Best beloved of all the old time shrubs, exquisitely fragrant bloom during the spring months; with ornamental foliage the entire season.

L. Common Purple—Valuable for high screen or for large group plantings.

L. Common White—Used same as purple and are the same except the bloom is white.

Persian Lilac—Purple and white, dwarf growing with slender branches and narrow leaves.

Price of above lilacs 3 to 4 ft. 70c each; ten for \$6.50.

French Named Lilacs or French Hybrid Lilacs—Growth is comparative short and stalky, easily trained into round-headed small trees. The blooms are larger and more pleasing to the eye than the common varieties. We grow both double flowered and single varieties and can furnish either double or single in the following colors: White, purple, satiny rose, red and lavender. 2 to 3 ft. \$1.00 each.

Philadelphus, Syringa or Mock Orange Coronarius—A fine old sort. Blooms early

and is very fragrant. Large, white flowers. 3 to 4 ft. 50c; ten for \$4.50.

Philadelphus Aurea—A golden leaved shrub of the semi-dwarf type. Looks well as a border planting in front of taller growing shrubs. 18 in. 75c; ten for \$6.50.

Philadelphus Virginalis—This new variety, will be the most popular of all the Mock Orange when it becomes better known. Good grower, six to eight feet; large green leaves, a perfect mass of very large, double white flowers in early summer and blooms some all season. Strong 3 to 4 ft. plant \$1.00 each; ten for \$9.00.

Viburnums

V. Sterilis (Common Snowball)—This shrub is very popular for planting in cemeteries, as the large white ball shaped bloom is at its best Decoration Day. 3 to 4 ft. 50c each.

V. Opulus (High Bush Cranberry)—Is noted for the beautiful coloring of its leaves in autumn and clusters of large red berries. 3 to 4 ft. 80c each.

V. Plicatum (Japan Snowball)—Erect, compact, growing 6 to 8 ft, attractive green leaves, a solid mass of pure white, ball shaped flowers in June. 2 to 3 ft. \$1.00 each.

V. Tomentosum—Similar to Plicatum except has single flat flowers. 2 to 3 ft. 90c each.

V. Americanum—Very similar to Opulus but more open and spreading with longer, more numerous, more visible and longer lasting fruits. Broad flower corymbs with the outer fringe usually fully open. Fruit bright scarlet. 3 to 4 ft. 80c.

V. Carlesii—This Viburnum is the finest of all. Bush is dwarf nature with dark green leaves, flowers are ball shaped, very fragrant and tinted pink, preserve their perfect form and usually last long time. 18 to 24 in. plants \$1.50 each.

V. Lantana (Wayfaring Tree)—One of the largest growing viburnums, from ten to fifteen feet. Leaves are very large, dark green in color, flowers are white, flat followed by bright red fruits, turning black when fully ripe, very attractive with both colored fruits at the same time. 3 to 4 ft. 80c each.

A field of Red Spirea growing in our nursery (Spirea Anthony Waterer)

Spirea Anthony Waterer—The Red Spirea. Dwarf, bushy, free bloomer, rarely ever growing over 2½ ft. Blooms late and continues with some bloom all summer. Flowers are rosy crimson in color, large flat clusters. 18 in. 50c each; 10 for \$4.50.

Spirea Froebeli—Very similar to Anthony Waterer, but grows taller and the flowers are pink. 2 to 3 ft. 50c each; ten for \$4.50.

Spirea Douglasii—Bush is upright with spike-shaped flower of beautiful rose pink. 2 to 3 ft. 50c each; ten for \$4.50.

Spirea Colossa Alba—Dwarf, bushy, spreading, white flowers borne in flat clusters. 18 in. 50c each; ten for \$4.50.

Spirea Thunbergi—A dense, fluffy bush with light green foliage, changing to red and orange in Autumn. Flowers pure white in early spring. 18 to 24 in. 50c each; ten for \$4.50.

Spirea Van Houttei—The well known

spirea that is planted more than any other variety, due to the wealth of bloom in May, when it is a perfect mass of white. 3 to 4 ft. 50c each; ten for \$4.50.

Spirea Aurea—Strong, upright grower; leaves are yellow changing to bronze in Autumn; flowers flat clusters of white, pinkish cast to the seed shells in fall. 2 to 3 ft. 50c each; ten for \$4.50.

Snowberry, White—Small, rose-colored flower with large clusters of pure white balls in fall and winter. 2 to 3 ft. 50c each; ten for \$4.00.

Snowberry, Red or Indian Currant—Very much like the White Snowberry, except the berries are smaller in size and cluster along the stems. 2 to 3 ft. 50c each; ten for \$4.00.

Tamarix Hispidia—Tall, spreading, with long slim branches, bluish green foliage; rose pink flowers in September. 4 to 5 ft. 70c each; ten for \$6.00.

Weigelia or Direvilla

Weigelias are one of the leading shrubs as they are good for group plantings or as single specimens, and because of their abundance of bloom and varied colors they can be used in landscape plantings to better advantage than most shrubs.

Prices of Weigelias

	Each	10
Rosea, 2 to 3 ft. -----	\$.40	\$3.50
Hendersoni, 2 to 3 ft. -----	.40	3.50
Candida, 2 to 3 ft. -----	.60	5.00
Florabunda, 2 to 3 ft. -----	.60	5.00
Variegata, 18 to 24 in. -----	.40	3.50
Eva Rathke, 2 to 3 ft. -----	.60	5.00

W. Rosea—Medium in size, good bloomer of rose pink flowers.

W. Candida—Tall, thrifty grower, dark green leaves and white flowers.

W. Hendersoni—Large, thrifty grower, heavy bloomer, dark pink flowers.

W. Florabunda—Thrifty grower, good bloomer, crimson flowers.

W. Eva Rathke—Grows to medium size, exceptionally heavy bloomer, dark red flowers.

W. Variegata—Dwarf grower, pink flowers with variegated leaf.

Evergreens

Evergreens are very popular for landscape work where the buildings are suitable for evergreen planting. Evergreens look well with brick buildings, colonial types, and some other types, if properly arranged. Our evergreen trees are always dug with a ball of earth burlapped around the roots to insure transportation and transplanting.

ARBORVITAE—

A. American—Grows naturally to a tree, can be pruned to low growths and used for hedges as well as large screens 2 to 3 ft. \$2.75 each; 3 to 4 ft. \$4.00.

A. Biota Orientalis—A comparatively low, broadly pyramidal tree, yellowish green foliage, overlapping branches giving appearance of growing in perpendicular layers. 2 to 3 ft. \$4.00 each.

A. Biota Nana Aurea—A handsome little dwarf tree, similar to above, except the foliage is golden yellow and does not grow very large. 12 to 15 in. \$4.00 each.

A. Pyramidalis—Very compact, erect and straight, pyramidal in form. Just the tree for planting on either side of the door step of taller buildings. 3 to 4 ft. \$5.00 each.

A. Globosa—A very compact form of Arborvitae that grows globe shape without any pruning. 12 to 15 in. \$1.50 each.

A. Ericoides—A dwarf growing tree, low and spreading, silvery green foliage, very fine cut leaf. 12 to 15 in. \$2 each.

A. Warreana (Siberian Arbor Vitae)—Similar to the American with heavier and fuller foliage and more compact habit. Foliage is darker green. 18 to 24 in. \$2.50 each.

A. Pyramidalis Douglasi—A pyramidal form; the foliage grows fern-like, branches often cristate at the ends. 3 to 4 ft. \$4.

JUNIPER—

J. Irish—Erect, slender and formal in habits; foliage sage green. 2 to 3 ft. \$2.50 each.

J. Virginiana (Red Cedar)—A fine hardy native tree, does well on a variety of soils. 3 to 4 ft. \$4.50 each.

J. Virginiana Glauca—A fine variety of the cedar family, with silvery gray foliage. 3 ft. trees \$5.00 each.

J. Douglasi Horizontalis—A spreading tree growing close to the ground, Trailing

Juniper; foliage bluish green. 15 to 18 in. \$3.00 each.

J. Sabina Prostrata—A trailing sort similar to above variety except the foliage is dark green. 15 to 18 in. \$3.00.

J. Pfitzeriana—A low growing, spreading type, suitable for border or foundation plantings. Foliage is steel grey in color. 18 to 24 in. \$4.00 each.

RETINSFORA—

R. Plumosa—A handsome tree with feathery, light green foliage. Grows medium tall, more or less stragley. 2 to 3 ft. \$3.

R. Plumosa Aurea—A very nice tree similar to above, except the foliage is very pronounced yellow in color. 2 to 3 ft. \$3.00 each.

R. Squarrosa Vetchii—Dense growth; soft, beautiful silvery blue foliage arranged in spirals. Has a dwarf nature in growth. 12 to 18 in. \$3.00.

PINE—Mugho—A very dwarf little tree. leaves short, stiff and formal, thickly distributed in tufts over the branches, globler in form. 12 to 15 in. \$3.00.

SPRUCE—

S. Colorado Blue—Vigorous and hardy making fine specimens with a broad base, sharply defined pyramidal; foliage bluish green with sharp needles densely set. 18 to 24 in. \$8.00.

S. Colorado Green—Habits same as the above except the foliage is dark green in color. 18 to 24 in. \$5.50 each.

S. Koster's Blue—The handsomest spruce that grows. The sharp, thickly set needles on stiff branches, very pronounced blue in color and very conspicuous in any planting. 20 in. specimens \$15.00 each.

S. Norway—Ideal for Christmas trees, hedges and wind breaks; rapid grower of open pyramidal habit, one of the most common evergreens. 2 to 3 ft. \$2.40 each; 3 to 4 ft. \$4.00 each.

BROAD LEAF EVERGREENS—

Mahonia Aquifolia—A beautiful evergreen shrub, with smooth, shiny holly-like leave; bright yellow flowers in May and followed by large blue berries borne in clusters. 12 to 18 in. \$1.50 each; ten for \$12.50.

Rhododendron Maximum—A beautiful evergreen shrub with large, broad, shiny dark green leaves; large clumps of pink flowers. 2 to 3 ft. \$4.00 each; 3 to 4 ft. \$6.00 each.

Kalmia Lantifolia (Mountain Laurel)—The best of the broad leaf evergreens; grows in shady, moist places to 10 ft. high; large, shiny, dark green leaves; bears abundance of white flowers, striped pink. Flowers are cup shaped; borne in large clusters; 2 to 3 ft. \$5.00 each.

Hardy Vines

Ampelopsis Veitchii (Boston Ivy)—This is the vine that you see clinging to the buildings, chimneys, etc. Leaves a deep green, changing to red and yellow in Autumn, berries are blue in clusters. The finest vine for covering brick walls or chimneys. 2 yr. plants 50c each; ten for \$4.50.

Aristolochia Sipo or Dutchman's Pipe—A fast growing vine with large, heart shaped leaves; very thick, compact grower; fine for covering porches; flowers light brown, shaped like a pipe. 2-year grafted \$1.00 each; ten for \$8.50.

Clematis Paniculata—Rapid growing vine with glossy foliage; vine is completely covered with small, white flowers in September; very fragrant. 40c each; ten for \$3.50.

Clematis Jackmanii—Very large morning glory like flowers, intense purple color, blooms throughout the summer. \$1.00 each; ten for \$8.50.

Clematis Madame Andre—Very similar in flower and growth as the Jackmanii, except the flowers are crimson red in color. \$1.00 each; ten for \$8.50.

Honeysuckle, Scarlet Trumpet—Flowers are scarlet, trumpet-shaped and borne in clusters, fragrant. 50c each; ten for \$4.50.

Honeysuckle, Hall's Japan—A very fast growing vine that retains its leaf practically all winter. Flowers are pure white, changing to yellow, very fragrant, blooms throughout the summer. Valuable for covering porches, fences, walls and banks. Many fruit growers are planting them in hillside orchards to keep the soil from washing away. 35c each; ten for \$3.50; 100 for \$25.00.

Wisteria Purple—Beautiful vine covered with long clusters of purple flowers shaped like locust flowers, very fragrant. 60c each; ten for \$5.00.

Wisteria White—Same as the purple, except the flowers are pure white. 60c each; ten for \$5.00.

Trumpet Flower (Bignonia Radicans)—A robust, woody vine, twining tightly with numerous roots along stems. Its large orange-scarlet flowers, shaped like a trumpet, cluster at tip of branches. 50c each; ten for \$4.00.

HALL'S JAPAN HONEYSUCKLE

Hedge Plants

Berberis Thunbergi (Japan Barberry)—

For a low hedge the Japan Barberry is hard to beat. If left to grow without pruning, it will rarely get above 3 ft. in height and can be trimmed to any lower height. Its bright red berries, and the foliage changing to orange scarlet in Autumn makes this a very popular hedge plant.

Berberis Thunbergi Atropurpurea—This is a new variety of the Japan Barberry, very similar in form, size, shape of leaf and berry, except the leaves are red when they first start and hold the same color all season. We have a few of these plants, two years old, to offer at 80c each; ten for \$7.

California Privet—This is the leading privet for hedges. Leaves are glossy, dark green and stay on the plant nearly all winter.

Ibodium Privet—Known by many as the Hardy California Privet, as it has the same dark green, glossy leaf and it is hard to distinguish it from the California; however, it does not hold its leaf as long; it is somewhat hardier and will succeed where the California freezes back.

Amoor River Privet—This privet is used for hedges where the winter is too cold for California to do well. It grows up straight, bears pruning very nicely and can be shaped into a very nice hedge.

Ibota Privet—This privet is used extensively in landscape work as well as for hedges. Grows more or less spreading, has white flower with black fruits in Autumn.

Regals Privet—A strong, very hardy type, with dark and shiny leaves. The branches are stiff, twiggy and horizontally spreading, gracefully drooping at the ends. Suitable for border or foundation planting or low hedge.

THE VAN SWERINGEN COMPANY Marshall Building Cleveland, O.

Nov. 12, 1926

The Champion Nurseries
Perry, Ohio
Gentlemen:

Attached hereto is our Order No. 2660 for the nursery stock in connection with the planting of Park Strips at Lee and South Woodland Roads. We have been favorably impressed with the quality of nursery stock which you have delivered to us this fall and appreciate your service in all respects. We trust that the stock which you will furnish under this order will be of the same quality and receive the same attention as those furnished for previous order.

Very truly yours,
The Van Sweringen Company
By V. B. Kofoed

VBK:G.R.S.

Kansas City, Kan.
April 8, 1927

H. J. Champion & Son
Perry, Ohio
Gentlemen:

My order of plants arrived today and I am so delighted with the prompt service, splendid plants and good condition on arrival that I wish to thank you for same and also to enclose another order.

Trusting to be just as well pleased, I assure you I will take pleasure in recommending you to our Garden Club.

Yours very truly,
Mrs. H. S. Howell

Roses

Ours are two-year, Northern field grown

Of all the flowering plants that grow the rose leads them all in popularity. However many rose bushes are planted each year that the owner does not get the desired results from, due perhaps, to the fact that the rose requires a little more care in choosing the location for the rose bed, selecting the stock and caring for them after planting, than many other plants.

To get better results from your rose bed: first select hardy, northern-grown plants, choose a sunny location, spade up the soil two spades deep, and if the soil is sandy, mix a good supply of clay or heavy soil with the sand, as roses like a heavy soil. Plant the bushes so that the branches will be two or three inches below the surface of the soil at the main stem. Prune the branches back to three or four buds, as they will start growing much quicker than if the top is not pruned at all. Prune them all back each year, especially the ever blooming varieties. The Hybrid Tees should have protection in the winter months. This can be done by pulling the soil up around the bush to about six inches, or cover the entire bed with straw, leaves or some other litter. Roses like a rich, well-drained soil; fertilize with well rotted manure or commercial fertilizer, but in either case, mix the fertilizer with the soil thoroughly.

HYBRID TEAS

Columbia—A very large, beautiful pink; its very large, double petals makes it a great bedding and cutting rose. 80c each; ten for \$7.50.

General McArthur—Dazzling crimson scarlet, exquisitely perfumed. One of the best red roses for cutting or bedding. 80c each; ten for \$7.50.

Gruss An Teplitz—Color, dark crimson. A constant bloomer; hardy and vigorous. 80c each; ten for \$7.50.

Killarney Pink—A beautiful rose pink in color; strong grower and blooms all summer. 75c each; ten for \$7.00.

Killarney White—Similar to the pink except color is pure white. 75c each; ten for \$7.00.

Los Angeles—Flaming pink and coral, shaded with gold. Flowers are very large and showy. 90c each; ten for \$8.50.

J. J. L. Mock—Vigorous in growth and hardy, with long smooth canes and great freedom of bloom. Flowers are round and full, bright pink, faced carmine. 80c each; ten for \$7.50.

Etoile de France—Velvety, garnet red cup with center of vivid cerise. Flowers large and full; fragrant. 90c each; ten for \$8.50.

Madam Edouard Herriot—The flowers are semi-double, well set amidst varnished bronze green foliage. The color is a glorious mingling of terra cotta, bronze, geranium red and dull copper. 80c each; ten for \$7.50.

Madam Butterfly—The buds are a rich Indian red-yellow at base. The flower opens a symphony of white, bright pink, apricot and gold. One of the finest roses. 90c each; ten for \$8.50.

Madam Alexander Druex—The bush is a medium grower; flower is medium in size, semi-double, cactus type petals. The color is rich copper toned with coral and shaded with gold at base of petals, and does not fade white as many of the yellow roses do. The very best yellow rose we have ever grown. \$1.25 each; ten for \$11.

Madam Caroline Testout—Flowers large and brilliant pink. The bush good, strong grower and seldom out of bloom. 75c each; ten for \$7.00.

Mrs. Aaron Ward—Buds are deeply cupped, the open flower delightfully attractive. Color, deep golden orange, shading to creamy yellow. 90c each; 10 for \$8.50.

Premier—A magnificent, large, deep roe pink; thrifty grower and is practically thornless. 80c each; ten for \$7.50.

Radiance Pink—Extra hardy, vigorous and prolific; crimson-rose shaded with opal and copper; heavy bloomer and blooms till cut by frost. 90c each; ten for \$8.50.

Radiance Red—The globular, heavy stem "Radiance" duplicated in all respects except color, which is a brilliant crimson. 90c each; 10 for \$8.50.

Sensation—Very large and double, in color a crimson-scarlet deepened over all by glossy maroon. A good, dark red of the new sorts. 90c each; 10 for \$8.50.

Hybrid Teas—Continued

Sunburst—A very beautiful yellow rose strongly suffused with orange at the center, buds and developed flower of good form, sweetly scented. 90c each; ten for \$8.50.

Souv. de Claudius Parnet—One of the finest new roses. Color, clear sunflower yellow; blooms are large and are produced in abundance. Bush strong, upright grower. 90c each; 10 for \$8.50.

HYBRID PERPETUALS

Bonstetten—Larger flowers of dark crimson maroon. Very fragrant. 70c each; ten for \$6.50.

Clio—A rose of perfect form and finish. Flowers large and borne in clusters. Flesh color with shaded rose-pink at center. 70c each; ten for \$6.50.

Eugene Furst—A dark red rose, free bloomer and very handsome. 70c each; 10 for \$6.50.

Fran Karl Druschki—One of the finest white roses; flowers very large, handsome and a good bloomer. 75c each; 10 for \$7.

General Jacqueminot—Flowers a brilliant crimson, fragrant and a free bloomer. The best known of the red roses. 70c each; ten for \$6.50.

George Arends—The pink Druschki; flowers large, silvery pink. 70c each; 10 for \$6.50.

Mrs. John Laing—A fine, free blooming rose; color a soft pink. Flowers well formed and very fragrant. 70c each; ten for \$6.50.

Paul Neyron—The largest rose grown; plant is strong and healthy, with clean glossy foliage. Color deep rose-pink and double; blooms from June till October. 70c each; ten for \$6.50.

Prince Camille de Rohan—A velvety crimson rose of deep shade; large and full. 70c each; ten for \$6.50.

Ulrich Brunner—Cherry crimson, fragrant and free bloomer; hardy and thrifty. 70c each; ten for \$6.50.

Willowmere—A robust garden rose of bushy habit with beautiful buds, very large flower and lustrous green foliage. Color rich shrimp pink, shaded yellow at center. 80c each; 10 for \$7.50.

CLIMBING ROSES

Aviature Blierot—Exquisite little buds of saffron yellow, shaded apricot; opening to a lighter tone. The bloom occurs in

clusters; very pleasing magnolia fragrance. Glossy foliage and good thrifty grower. 80c each; ten for \$7.50.

Climbing American Beauty—Flowers very large, deep pink; fragrant. Healthy, perfect foliage, strong climbing habit of growth. 80c each; ten for \$7.50.

Crimson Rambler—The bush is a strong grower, making shoots 8 to 10 feet in one season. Flowers are deep crimson and borne in clusters. 75c each; ten for \$7.00.

Dorothy Perkins—A very popular climbing rose with clear, shell pink flowers borne in clusters. 65c each; ten for \$6.00.

Dr. Van Fleet—Blooms extra large, color pure flesh pink changing to white. 75c each; ten for \$7.00.

Excelsia—Brilliant scarlet, double flowers. Foliage dark, glossy green and retains its color all season. 65c each; ten for \$6.00.

Flower of Fairfield (or Everblooming Crimson Rambler)—Similar to Crimson Rambler but blooms all summer. 75c each; ten for \$7.00.

Gold Finch—Buds rich lemon yellow opening a trifle lighter, fragrant. 65c each; ten for \$6.00.

Pauls Scarlet Climber—Very large semi-double flowers of crimson-scarlet in great abundance. Remain in bloom longer than most climbers. 80c each; 10 for \$7.50.

Silver Moon—Foliage glossy, dark green thrifty grower, with a little yellow in the center. 80c each; 10 for \$7.50.

White Dorothy—A white Dorothy Perkins, a vigorous grower and free bloomer. 65c each; ten for \$6.00.

MISCELLANEOUS ROSES

Ideal—Baby Rambler, rich garnet red, good grower and fine bloomer. 80c each; ten for \$7.50.

Erna Teschendorf—Red Baby Rambler. 75c each; ten for \$7.00.

Hugonis (Chinese Briar Rose)—Large thrifty grower; bearing abundance of flowers that are bright canary. 80c each; 10 for \$7.50.

HARDY PHLOX

Phlox offered in this catalog are all 2 year, field-grown plants.

Bridesmaid—Beautiful trusses; white with crimson eye. 20c each.

Dr. Konigshofer—Firey orange-scarlet with blood red eye. 40c each.

Dr. Charcot—Deep violet ground with a jagged flare of white at center. 30c each.

Hardy Phlox—Continued

B. Compte—Brilliant French purple; rich and highly pleasing to the eye. Tall growing. 30c each.

Deutschland—Glittering orange-carmine deeper at center. A tall grower and is very showy. 40c each.

Electra—Intense carmine, shot with violet. 40c each.

Etna—Broad florets; deep blood red. 30c each.

Elizabeth Campbell—Purest shrimp pink with a sharply defined white sunburst around the lilac-circled eye. 30c each.

Feuerbrand—Cerise and vermillion flamed with orange; one of the largest flowered in the orange red. 40c each.

Ferdinand Cortez—Deep crimson, overlaid coppery bronze toward the center. 20c each.

Gen. Von Heutz—Salmon-red and white with carmine eye. 40c each.

Geffon—Immense conical heads borne profusely. Warm mauve, emphatic carmine eye. 20c each.

Imperator—Brilliant carmine-red. 40c each.

Mrs. Wm. Jenkins—An early and free bloomer; very large, tall grower, pure white. 20c each.

Madam Benzanson—Bright aniline red. One of the best reds. 20c each.

Madam P. Langier—Dazzling crimson; very fine. 20c each.

Mrs. Ethel Prichard—A beautiful self-shade of rose-mauve. One of the extra fine new sorts. 45c each.

Mrs. Scholten—Very large pyramidal trusses and free bloomer; dark salmon pink. 30c each.

Commander or Hindenburg—Very large flower with strong, bushy growth. Brilliant cherry-red with dark eye. 30c each.

Rheinlander—A rare shade of salmon pink flowers and trusses of unusual size. 20c each.

Rijnstroom—A lovely shade of rose-pink, flowers much like Paul Neyron rose in color. 20c each.

Rosenberg—Bright, reddish violet with blood-red eye. 20c each.

Prof. Virchow—Bright carmine overlaid with orange-scarlet. 20c each.

Sir Edwin Landseer—Good light red tinted with rose. 20c each.

Septemberglut—Tall grower and vivid color effect; dark salmon-carmine. 40c each.

Widar—Light reddish violet with large white eye. 20c each.

HARDY PERENNIALS

Ajuga Reptans—An excellent ground coverer for shady places; grows 3 to 4 inches tall, bearing deep purplish-blue flowers in May and June. 25c each; ten for \$2.00.

Anchusa Italica—A strong growing plant covered in June with blue flowers an inch broad. 20c each; ten for \$1.80.

Aquilegia (Columbine)—One of the most beautiful old fashied plants, blooming in May and June. Colors, blue, white, red. 20c each; 10 for \$1.80.

Campanula (Cup and Saucer)—Hardest and most popular form; single cup-shaped flowers three inches long; blue, rose, white. 20c each; 10 for \$1.80.

Chrysanthemums—Among the latest blooming perennials. Good assortment of large flowering varieties. 25c each; \$2.00 for ten.

Coreopsis—A very hardy, strong growing plant bearing a profusion of bright yellow, daisy-like flowers. 15c each; ten for \$1.25.

Centaurea Montana—Bears large, loose-petaled, violet-blue flowers from July to Sept. 20c each; 10 for \$1.80.

Dicentra Eximea (Plumy Bleeding Heart)—a dwarf growing variety, bearing heart-shaped flowers, pink in color. 30c each; 10 for \$2.50.

Digitalis (Foxglove)—A grand display of thimble-shaped flowers on long spikes during July and August. Separate colors, rose, purple or white. 20c each; 10 for \$1.80.

Delphinium (Larkspur)—Bloom from June till frost; long, showy spike flowers on three to four foot stems. Light or dark blue. 20c each; 10 for \$1.80.

Funkia Variegata (Day Lily)—Graceful with narrow leaves, having a fluted white edge. 25c each; ten for \$2.00.

Gallardia (Blanket Flower)—Bears quantities of yellow flowers, with large brown center; resembles a small sunflower. 20c each; ten for \$1.80.

Golden Glow—Tall growing plant producing large quantities of yellow flowers from July till September. 15c each; 10 for \$1.20.

Gypsophila (Baby Breath)—Two to three feet tall, producing white flowers from July till September. Lasts long time after cutting. 15c each; ten for \$1.20.

Perennials—Continued

Hollyhock—Double crimson, yellow white, maroon and pink. 20c each; ten for \$1.80.

Hibiscus (Malloes)—Red, pink and white in separate colors. 20c each; ten for \$1.80.

Myosotis (Forget-Me-Not)—Bearing blue, yellow-centered flowers in early summer. 20c each; ten for \$1.80.

Pyrethrum (Painted Daisy)—Bearing mixed shades of red and pink daisy-like flowers. 20c each; ten for \$1.80.

Physalis (Lantern Plant)—Forms dense bush about two feet high, bearing orange scarlet, lantern-like fruits in abundance. 20c each; ten for \$1.80.

Primula (English Cowslip)—Hardy, primrose type, bearing flowers in spring in a wide range of colors. 20c each; ten for \$1.80.

Pinks—These old favorites are at their best in May and June, bearing their clove-scented flowers in great profusion, pink and white. 20c each; ten for \$1.80.

Stokesia—Cyanea Blue. bears freely, lavender blue flowers four to five inches broad. 25c each; ten for \$2.00.

Shasta Daisy—Alaska. large white flowers in abundance throughout the Autumn. 20c each; ten for \$1.80.

Sweet Williams—Very popular old-fashioned flower, bearing broad heads of showy bloom in May and June. 15c each; ten for \$1.20.

Tritoma Pfitzerii—Rush-like foliage. It blooms in August and September: large spikes of rich orange-scarlet on three-foot stems. A fine cut flower sort. 25c each; ten for \$2.00.

Viola (Tufted Pansy)—Handsome dwarf edging plants bearing flowers six to eight months in the year. Separate colors, light blue, white and yellow. 15c each; ten for \$1.20.

Yucca Filamentosa—The broad, sword-like foliage is evergreen; bears creamy white flowers on long stems 25c each; ten for \$2.00.

Yucca Filamentosa Variegata—Same as the above variety, except the foliage has a rim of white. 60c each; ten for \$5.00.

Peonies

Peonies have been a leading specialty with us for several years and in building up our stock we have been very careful in selecting only the best varieties.

A nice peony bed is in easy reach of everyone as the peony is one of the easiest flowers to grow, as they are perfectly hardy, thrive on any well drained soil, and require less care than most any other plant.

Plant them so the eyes are three inches below the surface of the soil, set them three feet apart and use nothing but bone meal for fertilizer and you will be greeted with a wealth of bloom each year from Decoration Day until July.

Our stock is thrifty and healthy and will furnish you with strong, three to five eye divisions.

Albert Crousse—The petals are imbricated like a carnation and overlap each other. The color is as wonderful as its form and is best described as an even delicate, sea shell pink. Late mid-season. \$1.00 each.

Couronne de Or—Large, semi-rose type. Pure white with a ring of stamens around a tuft of center petals, tipped carmine, late. 75c each.

Duchess de Nemours—Creamy white, cup-shaped flower with greenish reflex. Good grower and abundant bloomer. Profitable cut flower sort. Late. 75c each.

Festiva Maxima—Pure white, extra large center petals tipped carmine, strong grower. Medium early. 50c each.

Felix Crousse—Large, ball shaped bloom very bright red, marked cardinal at base of petals. Mid-season. 75c each.

Baroness Schroeder—Delicate flesh—changing to white. Rose type, immense flowers of great substance with high chalic center. Lasts a long time after cutting. Late Mid-season. \$1.50 each.

Louis Van Houtte—Medium size, semi-rose type. Deep carmine-rose, tipped silver with grey reflex. Late. 40c each.

Mons Jules Elie—Peerless pure pink. Glossy lilac pink shading to deeper rose at base. Very large and full globular, with broad, overlapping petals. Strong, vigor-

ous, free bloomer. Bomb type, early mid-season. 75c each.

Marie Crousse—Soft salmon-pink shaded black marone with metallic reflex, pronounced yellow stamens at center. Very large, well-formed flowers with rounded petals. Semi-rose type, mid-season. \$3.00 each.

Mons Martin Cahuzac—Brilliant purple-red, shaded black maroon with metallic reflex, pronounced yellow stamens at center. Very large well formed flowers with rounded petals. Semi-rose type; mid-season. \$4.00 each.

Margarite Girard—Magnificent broad, thick heads of hydrangea pink, marbled on creamy white and enriched by collars of golden anthers. Very late. \$1.00 each.

Maud L. Richardson—Very large, compact bloom of pale lilac rose. Strong grower and free bloomer. Very late. \$2.00 each.

Officinalis Rubra—Bright crimson, large globler bloom, earliest of all Peonies. 60c each.

Richardson's Rubra Superba—Deep crimson, very large, full and double, highly fragrant and the best keeper of all, very late. 50c each.

Sarah Bernhardt—A flat, compact, rose type, uniform mauve-rose or apple-blossom pink, silvery tipped, fragrant; late. \$2.50 each.

Therese—This is the queen of Peonies. Easily the most popular of the finer peonies and every collection should include this wonder of the Peony family. Produces enormous, rich satiny, pink flowers with glossy reflex. Plant is very strong grower producing a great number of blooms that will measure eight to ten inches broad. Rose type; mid-season. \$5.00 each.

WHAT, WHERE, WHEN and HOW TO PLANT

Conditions of Sale

IN filling orders from this list we reserve the right in case that we are out of a variety, to substitute another of equal merit when it can be done (always labeling with the correct name) unless the party ordering says "no substituting," in which case we will fill the order so far as we can and return the balance. Always give full and explicit shipping direction, as our responsibility ends on delivery of trees in good condition at the freight office.

We shall be pleased to quote prices to any one desiring different sizes or stock in larger quantities than offered herein. In sending list state definitely the number of each size and variety wanted.

We guarantee all stock to be up to size and grade specified in list, to be in good condition and carefully packed; this guarantee holds good only when prompt notification on arrival of stock is sent us, stating plainly any errors or cause of complaint.

While we exercise the greatest diligence and care to have all our trees, etc., true to label, and hold ourselves in readiness, on proper proof, to replace all trees, etc., that may prove untrue to label, free of charge, or refund the amount paid, it is mutually understood and agreed to between the purchaser and ourselves, that our guarantee of genuineness shall in no case make us liable to any sum greater than that originally received for said trees, etc., that prove untrue.

TERMS—Cash, unless otherwise agreed upon. 5 at 10 rates, 50 at 100 rates. No charge for delivery at express office or railway station here.

THE CHAMPION NURSERIES
